## WORK HISTORY

### Quality Engineer Technician I (Software)

REVOLUTION RETAIL SYSTEMS | CARROLTON, TEXAS  
APRIL 2016 | PRESENT

- Windows Image Testing
  - Certify new Windows system images on various PC types
  - Identify system performance requirements and recommend enhancement options
- Hardware Testing
  - Certify new hardware products from vendors and manufacturers
  - Execute test cases to verify products perform in accordance with the requirements
  - Conduct testing in support of new engineering research projects that require qualifying new hardware devices
- Software Testing
  - Perform manual testing on company software
  - Perform automated testing using bash scripts
  - Report software bugs found in log files and created through manual manipulation
  - Track, document, and report test results in Jira
  - Provide test support for urgent updates during the release deployment and post-implementation software phases
- Project Management
  - Collaborate with the software engineers, to create test plans to verify requirements are fulfilled
- Documentation
  - Occasionally update documentation for customer-facing operating procedures using Microsoft Office Suite products
  - Develop and document test cases/procedures to ensure the products meet requirements, both at nominal and boundary conditions.
